**ANNUAL STATISTICAL REPORT
FISCAL YEAR 1998-99
NORTH CAROLINA ALCOHOL & DRUG ABUSE TREATMENT
CENTERS**

INTRODUCTION:

This is an annual report providing information from selected service indicators on the North Carolina Alcohol & Drug Abuse Treatment Centers (ADATC). Data included in the report are compiled from client admissions, client movements including discharges, and client diagnostic information. The data are stored in the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services client database.

Six detail summary tables are presented in this report. Eight additional graphs are provided to highlight data in the summary tables. Table 1 provides population summary data for fiscal year 1999 for each of the three Alcohol & Drug Abuse Treatment Centers. Data on persons served by region and county are presented in Table 2a, Table 2b, and Table 2c. Table 3a provides the demographic characteristics of the persons served at the three ADATCs. Table 3b shows the number of persons served by the three ADATCs by employment status and education. Table 3c presents number of persons served by the three ADATCs for two populations of special interest, pregnant women and injection drug users, by commitment level, and by diagnosis. Table 4 provides a comparison of major service indicators for the past ten fiscal years and Table 5 provides Discharge Days and Average Length of Stay for each of the three Alcohol & Drug Abuse Treatment Centers. Table 6a displays the primary drug of choice, while Table 6b provides any drug of choice for three Alcohol & Drug Abuse Treatment Centers.

ADMISSIONS:

Admissions have increased from 2,553 in fiscal year 1998 to 3,727 in fiscal year 1999 due primarily to the inclusion of the ADATC Butner. The percentage of first admissions was 58%. The percentage of first admissions has slightly decreased from 63% in fiscal year 1998. Of those persons admitted to an ADATC for the first time in fiscal year 1999, 36% were admitted to Black Mountain, 35% to Walter B. Jones, and 29% to Butner.

DISCHARGES:

There were 3,731 total direct discharges, deaths, indirect discharges, and transfer-outs in FY99. There was one death reported during FY99. The percent of direct discharges among total discharges was about 99%, while the percent of indirect discharges, those clients being discharged while on some type of leave placement, was about 1% in fiscal year 1999.

PERSONS SERVED:

The statistic "Person Served" is calculated by summing the book population at the beginning of the fiscal year plus all admissions and readmissions during the year. There were 3,933 persons served in state Alcohol & Drug Abuse Treatment Centers during fiscal year 1999.

The number of persons served per 100,000 population continues to be significantly lower in the South Central Region, at 34.6, than in the remaining three regions, in which each of the ADATCs is located. The Western, North Central, and Eastern regions rates are 50.9, 46.4, and 74.3 persons served per 100,000 population respectively. The "Persons Served" rate ranges from a high of 179.8 in Anson County to a low of 6.7 in Cumberland County, with an overall statewide rate of 51.4.

The average length of stay in FY99 was 20.1 days, 3.0 days decrease from 23.1 days in FY98. The length of stay decreased at Black Mountain by 0.7 of a day and at Jones by 1.1 days. Since Butner ADATC was not reported last year, there is no comparison to the length of stay for FY99.

About thirty three percent of persons served at the ADATCs in FY99 were women, a decrease from 35.4% in FY98. The percentage of nonwhite persons served at ADATCs was 40.7% in FY99, slightly increase from 40.6% in FY98.

For fiscal year 1999, 48.9% of the persons served reported alcohol as their primary drug of choice and 41.5% reported cocaine. In FY99 alcohol as a primary drug of choice decreased by 2.7% and cocaine as a primary drug of choice increased by 3% compared to FY98. Overall, 78.1% of persons served reported abusing alcohol, 64.5% cocaine, and 42.8% marijuana in FY99.
